

GETTING READY TO TAKE THE CENSUS

Call is Made for Applicants Who
Wish to Have a Hand in
This Big Job.

REQUIRES ALMOST A YEAR

Uncle Sam is Going to Be Particular
Who He Gets to Work
For Him.

WASHINGTON, March 22.—The providing for the fourteenth and subsequent decennial censuses was signed by the president on March 3. The enumeration, which will be made in January, 1920, is now less than ten months distant, and the census bureau already has under consideration the selection and appointment of not to exceed 400 supervisors who will have charge of the 90,000 enumerators. The supervisors' districts are, in most cases, except in the large cities, have the same boundaries as the congressional districts. The supervisors, under the law, are to be appointed by the secretary of commerce upon the recommendation of the director of the census.

The following instructions have been given the secretary of commerce to the director of the census in regard to the procedure to be followed in making selections and appointments of census supervisors:

Test Examinations.
"Conforming to the assurance given the president in my letter to him on March 3, you will please be guided by the following instructions respecting appointments to the post of supervisor in connection with the taking of the fourteenth census of the United States:

"A test examination of which a record will be kept, is to be required for appointment to the post of supervisor. In addition to this a careful personal inquiry is to be separately made respecting the qualifications of each candidate. Of this inquiry, also, a record will be kept for making appointments from those who shall have passed the test examination and the separate inquiry as to qualifications, preference is to be given to those candidates who have had executive, administrative, statistical or accounting experience and to those who have had charge of bodies of men as administrators, provided in all cases that men with the experience and possess the other qualifications necessary.

"You will arrange to give notice to the above effect to every candidate applying for appointment and to his sponsors, and no candidates are to be selected for appointment who do not pass both the test examination and the personal inquiry.

Selections to Be Careful.
"You are requested to ask the civil service commission to prepare the blanks for the test examination or to cooperate with you in the preparation of them. You will welcome the assistance of the civil service commission in this and in any other respect in which they can be helpful to you.

"It is my earnest desire, as I know it is yours, that the census shall be an example in its quality, as well as in its promptness. I need hardly say that neither result can be had unless the supervisors are selected with special care to their individual fitness for their task. I am dependent on you as the responsible officer in immediate charge of the work to see that every precaution is taken to relieve this result. In particular, the appearance as well as the fact of political patronage are to be avoided and fitness for the work to be done will be the controlling factor in the appointments.

Whole Year's Work.
The director of the census has already taken steps to carry out the instructions of the secretary. The supervisors' duties will occupy full time for the greater part of a year, beginning about July 1, 1919. Their compensation will be \$1,500 plus \$1 for each thousand or major fraction of a thousand of population enumerated. The total compensation in an average-sized district, outside a large city, will therefore be

between \$1,700 and \$1,800. Clerk hire and other necessary expenses will be paid by the government. All candidates for supervisoryships should address their applications to the Director of Census, Washington, D. C.

SETTLE IRISH SELF-RULE AT HOME, SAYS PLUNKETT

NEW YORK, March 22.—The time is ripe to solve the problem of self-government for Ireland and it must be settled in Ireland and not elsewhere, in the opinion of Sir Horace Plunkett, who departed today for the British Isles after seven weeks in this country, devoted largely to studying American sentiment regarding the age-long issue of his native land.

"The war should have brought peace, must bring an Irish settlement," he declared. "Announcing his opposition to any plan involving partition of Ireland, which from time to time finds favor at Westminster," Sir Horace said, he found American opinion "quite definite" in this regard, adding that division of the island "would no more satisfy the American public than it would be tolerated by the sentiment of Ireland." He reported Americans "united as never before in the 40 years I have been coming to this country in a desire to see full justice done in the national aspirations of Ireland."

WILL VISIT FRANCE ON AGRICULTURAL MISSION

JEFFERSON CITY, Mo., March 22.—Dr. J. H. Mumford, dean of the Missouri college of agriculture, is to go to France some time this month to represent American agriculture, according to an announcement by the state board of agriculture, of which Doctor Mumford is a member.

At the request of the French government, a commission of representatives from industry and education in America is to visit the leading universities, commercial and art centers of France with a view to improving cultural relations with the United States.

MISSOURI DOES NOT LOOK FOR MUCH LOCUST TROUBLE

JEFFERSON CITY, Mo., March 22.—Although 1919 is a "locust year," the insect plague is not expected to hatch in Missouri in large numbers, says an announcement to the state board of agriculture. The announcement points out that the "epidemic locust," or so-called "locust," is not really a locust, but such is the name generally applied to the 17 and 13 year pests. Both broods have been under investigation for over 200 years and their appearance is figured by entomologists almost as accurately as astronomical foretell eclipses.

Y. W. C. A. WAR COUNCIL DECIDES NOT TO DISSOLVE

At the March meeting of the national war work council of the Young Women's Christian association it was decided that the war work council, as such, would continue functioning in its present status until such time as all war work undertaken by the council is finished.

This decision was made after the presentation of a plan for dissolving the council on June 1 or some specified date after which the work of the council would be carried on by a continuation committee until it is finished as is being done by some other of the large national organizations.

PERRAM ARRANGES FOR AMPLE TIRE SUPPLY

G. A. Perram, of the Tulsa Rubber and Vulcanizing company, returned from Kansas City Friday and reports he made arrangements for a steady and adequate supply during the coming season of Michelin & Masson fabric cord and solid tires, owing to the coming shortage of standard makes of tires. Mr. Perram believes that this will be good news to the automobile owning portion of Tulsa's population.

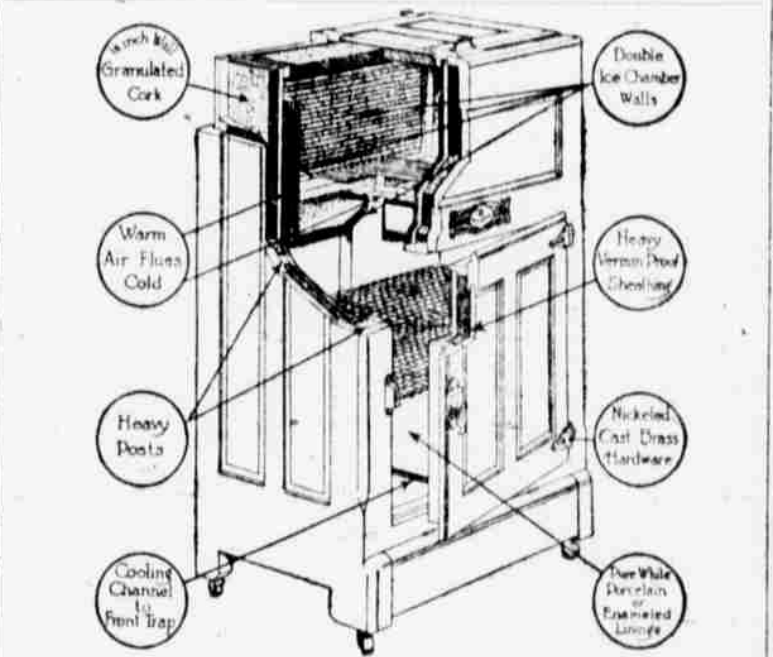

Police at State Meeting Here to Work Out Bad Boy Reforms

A subject which is receiving much consideration from the general public, yet it contains plenty of food for wholesome thought, is the matter of properly correcting wayward youths.

The so-called state reform schools are very much overcrowded and as a consequence when a boy is sentenced to one of them after committing a crime he is released in a very short time to make room for other youths who have strayed from the straight and narrow path. The boy fully realizes why he has been given his liberty and he is likely to succumb the very next time he is tempted to error. Furthermore, it is a question open for argument, if the system in vogue in these schools really does make an honest and industrious man out of the mischievous though probably good-at-heart youngster who is sent there to be reformed.

Detective H. Carmichael of the local force, who through many years of experience in handling the juvenile cases of the department, has looked upon as a man fully capable of caring for all so-called bad boy cases, is the author of the abolition of Oklahoma's reformatories.

Carmichael strongly resents the term criminal when applied to any of "his boys," as he calls the wayward chaps, and firmly believes that crime in the youth is purely a matter of environment with the vast majority of boys, and if properly

Superior Features of the North Star Refrigerator

One and one-eighth inch wall of Granulated Cork, the best known insulating material, is packed between two walls of vermin proof sheathing.

Air flues allow the freest possible circulation of air, filling the food compartment below and forcing the warm air up through the flues at the end of the ice chamber.

Double walls are used in the ice chamber to prevent condensation of moisture on the surface exposed in provision chamber.

No expense is spared in the North Star in making it of solid durable construction. Always glad to show you why the North Star is best for all purposes.

THE most important item about a refrigerator is the insulation—that is, what the material in the walls is; to keep in the cold and keep out the heat. The so-called cheap refrigerator does not have this and is therefore not cheap, but really high-priced, as it is wasteful of ice.

Here is an example of this saving given us by one of our North Star customers: "When I was renting furnished rooms our ice bills were 90 cents a week. We moved and bought a North Star of larger size and our ice bills were only 30 cents a week." We will give you this customer's name on application.

We guarantee North Star Refrigerators fully.
